Computer Networks – ICT1253

Level 1 - Semester - 2

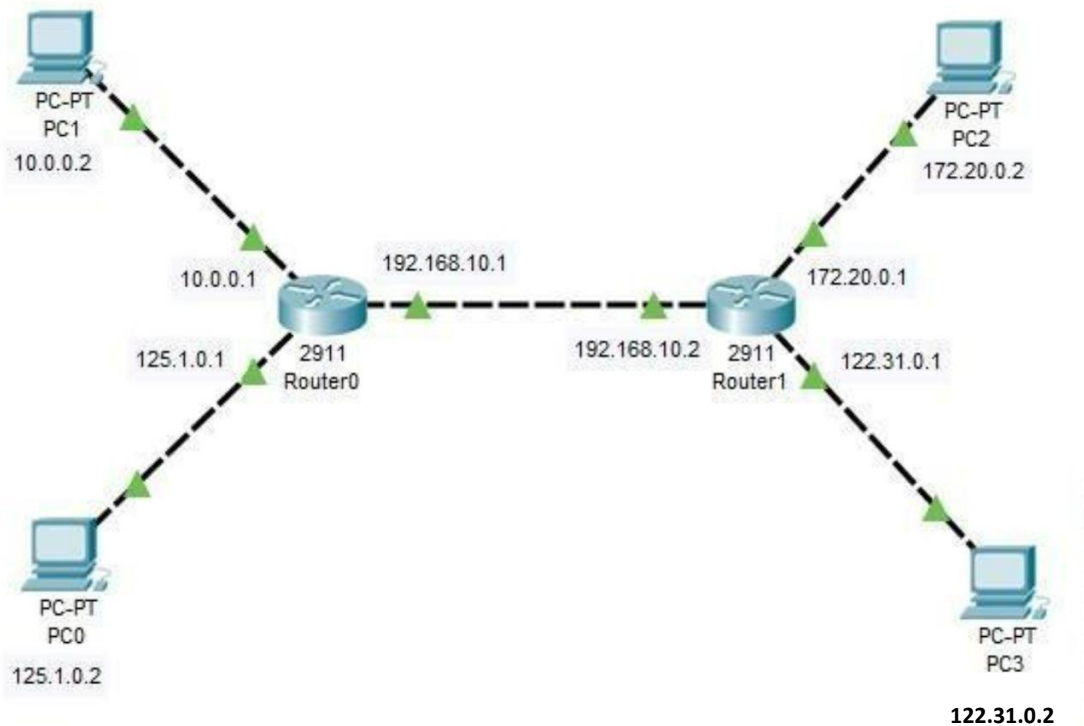

Lab Sheet 12

Goals:

Understand dynamic routing protocols (Part 2)

Exercise 1:

1. Read the document about OSPF.
2. Open Cisco packet tracer.
3. Add devices to the workspace.

4. Connect those using proper cables.
 5. Assign IP addresses to relevant PCs and routers.
- IP blocks:

192.168.10.0 / 30
125.1.0.0 / 16
10.0.0.0 / 8
172.20.0.0 / 16
122.31.0.0 / 16

6. OSPF configuration for Router 0.

```
Router(config)#router ospf 100  
  
Router(config-router)#network 10.0.0.0 0.255.255.255 area 0  
  
Router(config-router)#network 125.1.0.0 0.0.255.255 area 0  
  
Router(config-router)#network 192.168.10.0 0.0.0.3 area 0
```

7. OSPF configuration for Router 1.

```
Router(config)#router ospf 200  
  
Router(config-router)#network 122.31.0.0 0.0.255.255 area 0  
  
Router(config-router)#network 172.20.0.0 0.0.255.255 area 0  
  
Router(config-router)#network 192.168.10.0 0.0.0.3 area 0
```

8. Try these commands.

```
Router#show ip route  
  
Router#show ip protocols
```

9. Ping between PCs. Then save the workspace.

~~~~~
